CODE CREW CAREERS

Before you Start:

* What potential issues could arise?

* What technical build elements are we potentially underestimating?

* Are we packing too many elements into this build?

* What is the agree upon definition of "done"?

During the Project:

* What happens, if we don't do include this?

* Is this a new problem or have users been dealing with it for a while?

* Is this new issue essential to the baseline project?

* How can we keep the project on track and address this new item later?
